

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

Claims 1-119. (Canceled)

120. (New) A method of making up eyelashes comprising applying to said eyelashes a mascara comprising:

- (i) at least one solid substance that has a melting point of about 45°C or greater;
- (ii) isododecane;
- (iii) at least one structuring polymer chosen from polymers of following formula (I):

in which n is an integer which represents the number of amide units such that the number of ester groups present in said at least one structuring polymer ranges from 10% to 50% of the total number of all said ester groups and all said amide groups comprised in said at least one structuring polymer;

- R^1 , which are identical or different, are each chosen from alkyl groups with at least 4 carbon atoms and alkenyl groups with at least 4 carbon atoms;

- R², which are identical or different, are each chosen from C₄ to C₄₂ hydrocarbon-based groups with the proviso that at least 50% of R² are chosen from C₃₀ to C₄₂ hydrocarbon-based groups;

- R³, which are identical or different, are each chosen from organic groups comprising atoms chosen from carbon atoms, hydrogen atoms, oxygen atoms and nitrogen atoms with the proviso that R³ comprises at least 2 carbon atoms; and

- R⁴, which are identical or different, are each chosen from hydrogen atoms, C₁ to C₁₀ alkyl groups and a direct bond to at least one group chosen from R³ and another R⁴ such that when said at least one group is chosen from another R⁴, the nitrogen atom to which both R³ and R⁴ are bonded forms part of a heterocyclic structure defined in part by R⁴-N-R³, with the proviso that at least 50% of all R⁴ are chosen from hydrogen atoms;

- (iv) water;
- (v) at least one coloring agent; and
- (vi) at least one preservative.

121. (New) The method of making up eyelashes according to claim 120, wherein said mascara further comprises at least one neutralizing agent.

122. (New) A method of making up eyelashes comprising applying to said eyelashes a mascara comprising:

- (i) at least one solid substance that has a melting point of about 45°C or greater;
- (ii) isododecane;
- (iii) at least one structuring polymer chosen from ethylenediamine/stearyl dimer tallate copolymers;
- (iv) water;
- (v) at least one coloring agent; and
- (vi) at least one preservative.

123. (New) The method of making up eyelashes according to claim 122, wherein said mascara further comprises at least one neutralizing agent.

124. (New) A method of making up eyelashes comprising applying to said eyelashes a mascara comprising:

- (i) at least one solid substance that has a melting point of about 45°C or greater;
- (ii) isododecane;
- (iii) at least one structuring polymer chosen from ethylenediamine/stearyl dimer dilinoleate copolymers;
- (iv) water;
- (v) at least one coloring agent; and
- (vi) at least one preservative.

125. (New) The method of making up eyelashes according to claim 124, wherein said mascara further comprises at least one neutralizing agent.
